4 QUALITY EDUCATION

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

ICDE World Conference on Online Learning The Dublin Declaration - 2019

ICDE World Conference on Online Learning
The Dublin Declaration - 2019

Introduction

Set against the backdrop of Samhain, a Celtic tradition dating back thousands of years celebrating the changing of the seasons from light to dark, the 25th ICDE World Conference on Online Learning in Dublin brought together around 500 educators from 50 countries. Over the days in November 2019 the World Conference provided a timely opportunity to critically, critically reflect on and celebrate the many and varied faces of online education. Framed by the overarching theme of Transforming Lives and Societies, the discussions in Dublin explored competing powerful change forces and different and contrasting preferred futures for online Learning. The following paragraphs help to tease out and distil some of the key messages.

1. Shifting shapes

Online education is not a neat singular shape. There are a variety of forms of online education and greater understanding is still required of the contextual and societal contours and the influence of important cultural factors in supporting learning. Moreover, the boundaries between online, open, digital and traditional models of distance learning have become increasingly blurred—for better and for worse. Online and off-line education is not a simple duality between good and bad, old and new, public and private - such binary thinking fails to convey the complexity and rapidly shifting forms of online learning and education.

2. Shades of Openness

There is a sense in which Openness is the elixir, the new gold standard of education and research. However, openness can be opaque with many different meanings and challenges. A broad spectrum critique of open is continually required, so that a myriad of education and learning futures can emerge. A renewed commitment to open practices and social justice for transformative learning experiences was asserted in Dublin.

3. Sharpening the Shoos

Talk of openness also raises controversial questions about business models. Such questions

Introduction

Set against the backdrop of Samhain, a Celtic tradition dating back thousands of years celebrating the changing of the seasons from light to dark, the 25th ICDE World Conference on Online Learning in Dublin brought together around 500 educators from 50 countries. Over the days in November 2019 the World Conference provided a timely opportunity to critically, critically reflect on and celebrate the many and varied faces of online education. Framed by the overarching theme of Transforming Lives and Societies, the discussions in Dublin explored competing powerful change forces and different and contrasting preferred futures for online Learning. The following paragraphs help to tease out and distil some of the key messages.

1. Shifting shapes

Online education is not a neat singular shape. There are a variety of forms of online education and greater understanding is still required of the contextual and societal contours and the influence of important cultural factors in supporting learning. Moreover, the boundaries between online, open, digital and traditional models of distance learning have become increasingly blurred—for better and for worse. Online and off-line education is not a simple duality between good and bad, old and new, public and private - such binary thinking fails to convey the complexity and rapidly shifting forms of online learning and education.

2. Shades of Openness

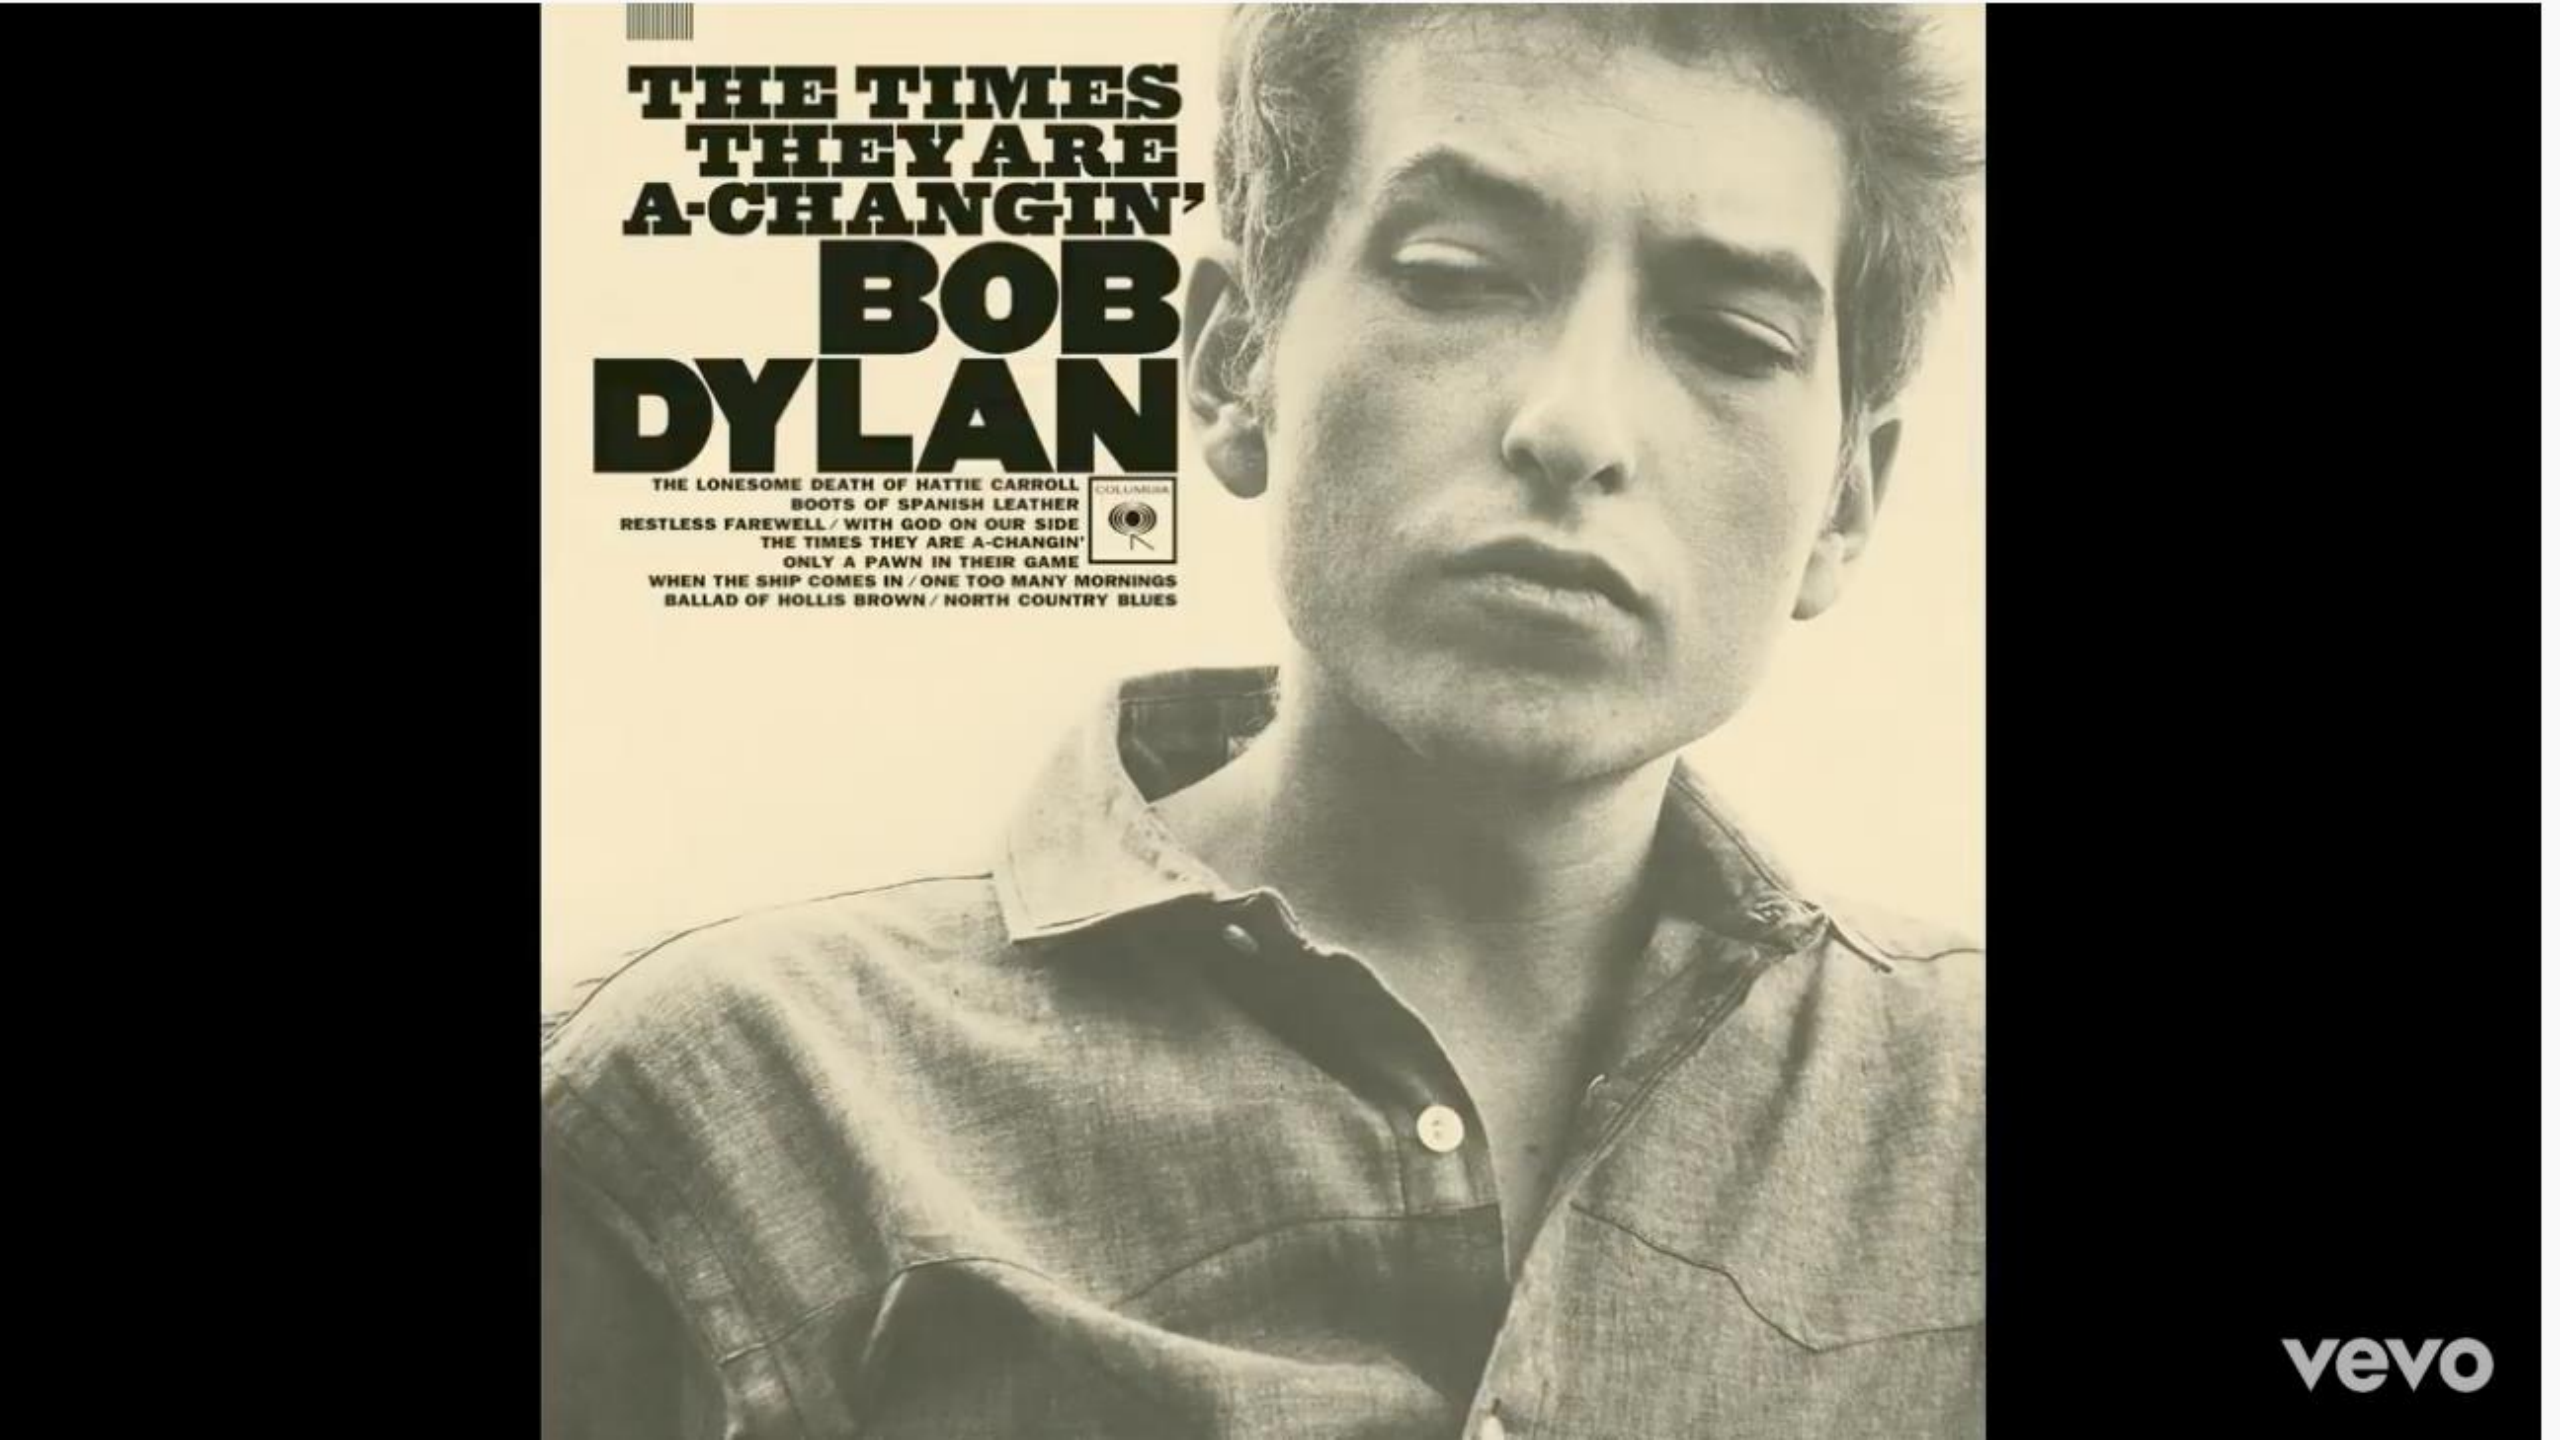

There is a sense in which Openness is the elixir, the new gold standard of education and research. However, openness can be opaque with many different meanings and challenges. A broad spectrum critique of open is continually required, so that a myriad of education and learning futures can emerge. A renewed commitment to open practices and social justice for transformative learning experiences was asserted in Dublin.

3. Sharpening the Shoos

Talk of openness also raises controversial questions about business models. Such questions

4. Sunsets and Breakings

A key theme emerging from Dublin was that traditional face-to-face delivery models should no longer be viewed as the default or baseline of education and lifelong learning. Indeed, new and emerging models of online learning challenge conceptions of good pedagogy—irrespective of when, where and how people choose to study and learn. The continuing development of online education is impacting all delivery models and blurring the distinction between formal, non-formal, and informal learning. This point is evidenced by the strong focus in Dublin on the continued emergence of micro-credentials and their position within the landscape of recognised learning pathways.

E D U C A U S E

BEFORE

A homogeneous society (business structure, culture) offered its members opportunities for social mobility and personal development. Employment relationships were stable, and productivity growth manifested itself as positive income development. The need for support is exceptional and occurs only occasionally.

TODAY

Heterogeneity is increasing: the economic structure is changing, cultural diversity is increasing, regions are becoming more diverse and the population is ageing. The need for support and guidance is increasing and diversifying.

IN THE FUTURE

Diversity will be the new normal, and different communities and networks emerge. Creative destruction is changing regions, the economic structure and jobs. The need for support and guidance is individualised.

Robert Schmitt

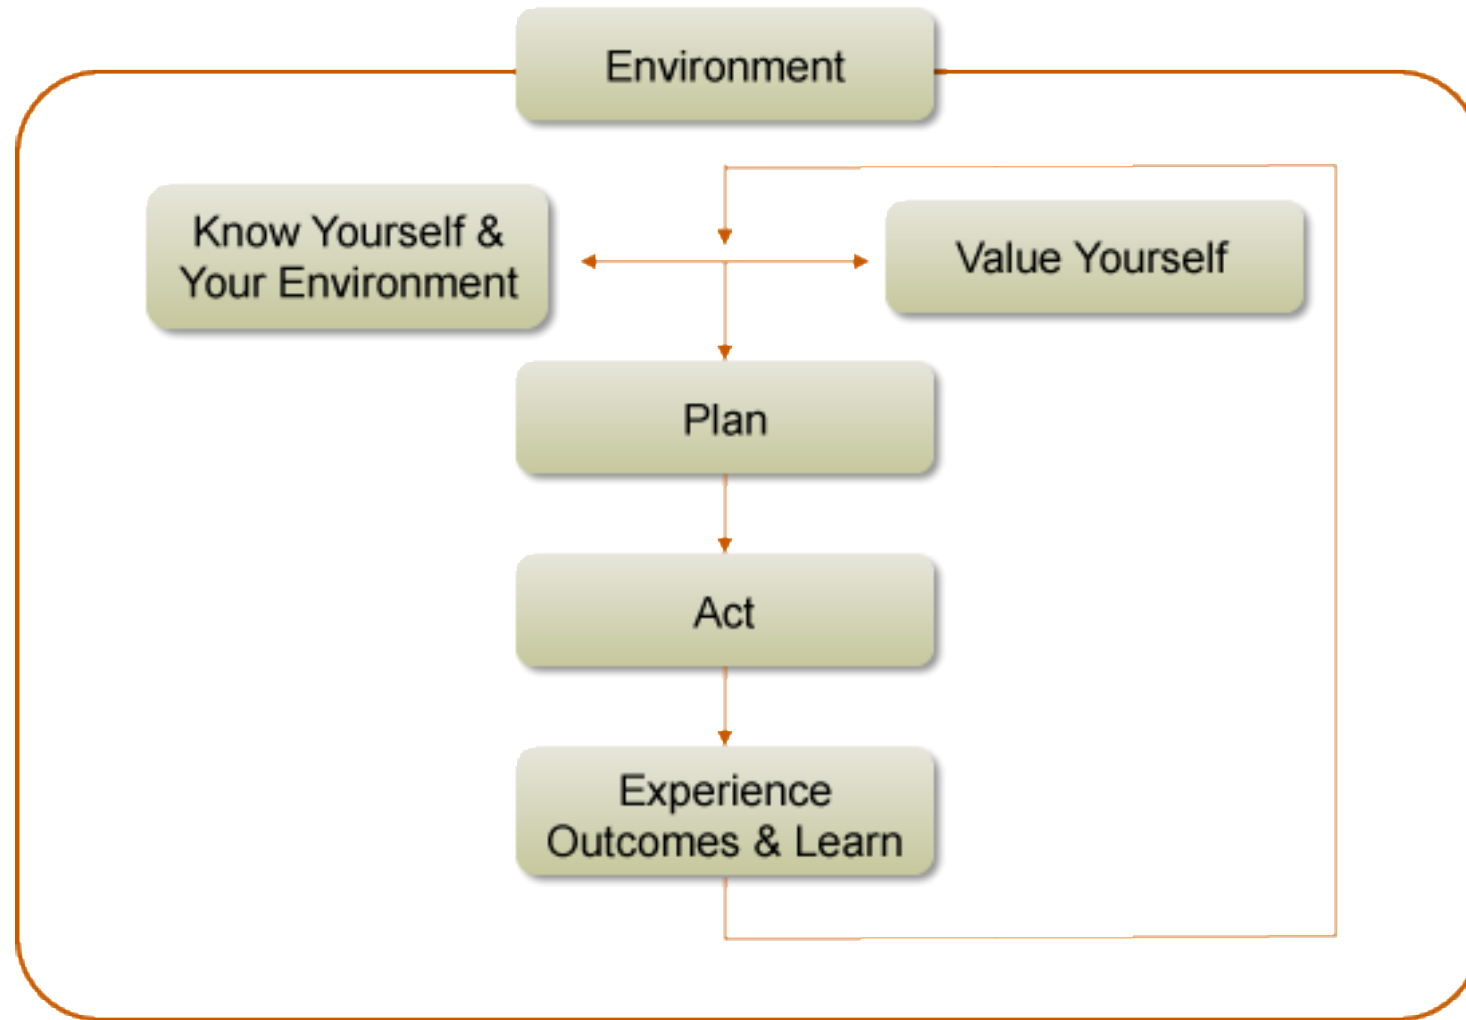

Self-Determination Theory (SDT)

one of the theories of **Human Motivation**

Motivation is a process that starts with a physiological or psychological need that activates a behavior or a drive that is aimed at a goal.

The central premise of the theory is that individuals have **innate tendencies towards personal growth and vitality** that are **either satisfied or thwarted by their immediate environment.**

Model of Self-Determination

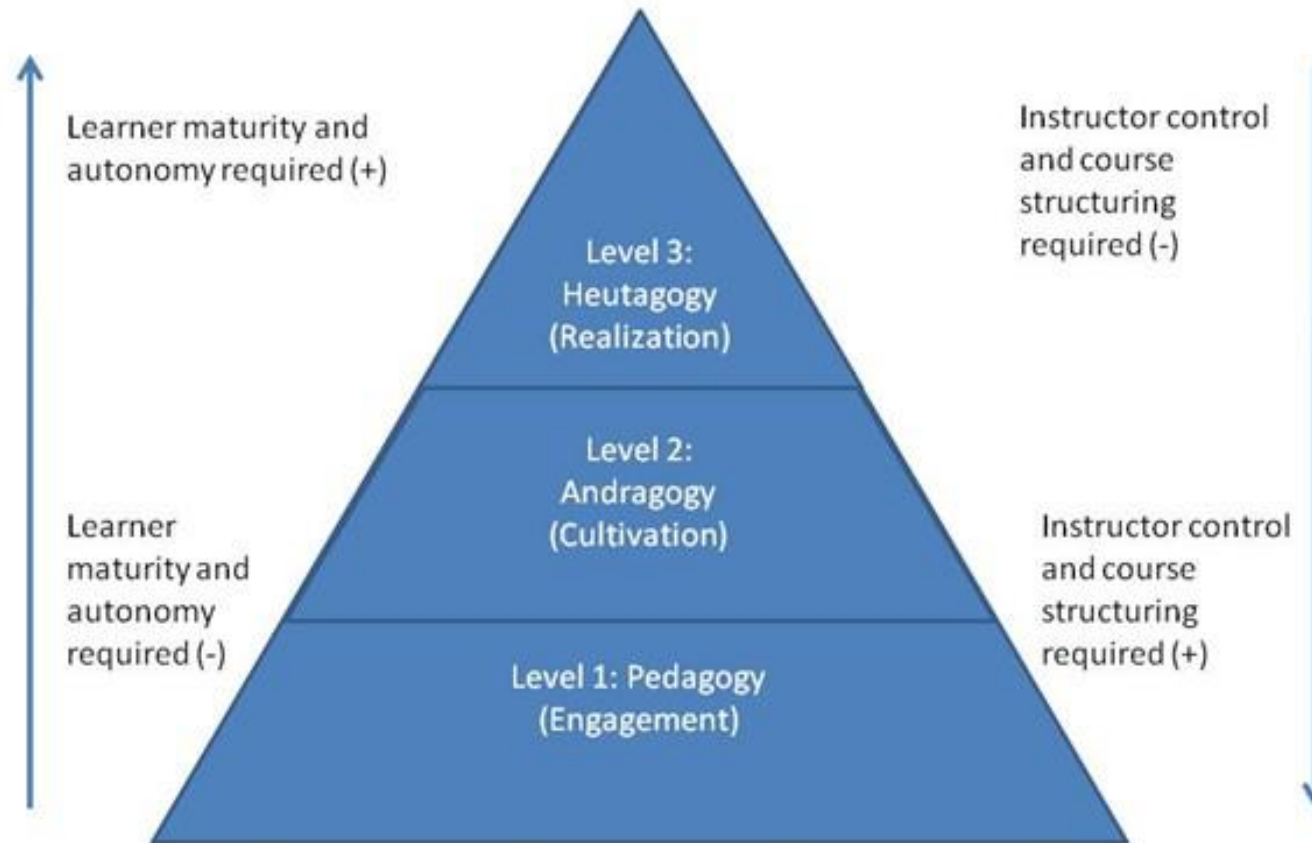

Figure 2. Progression from pedagogy to andragogy then to heutagogy (based on Canning, 2010, p. 63).

Self-Determined Learning

Formal Term: Heutagogy

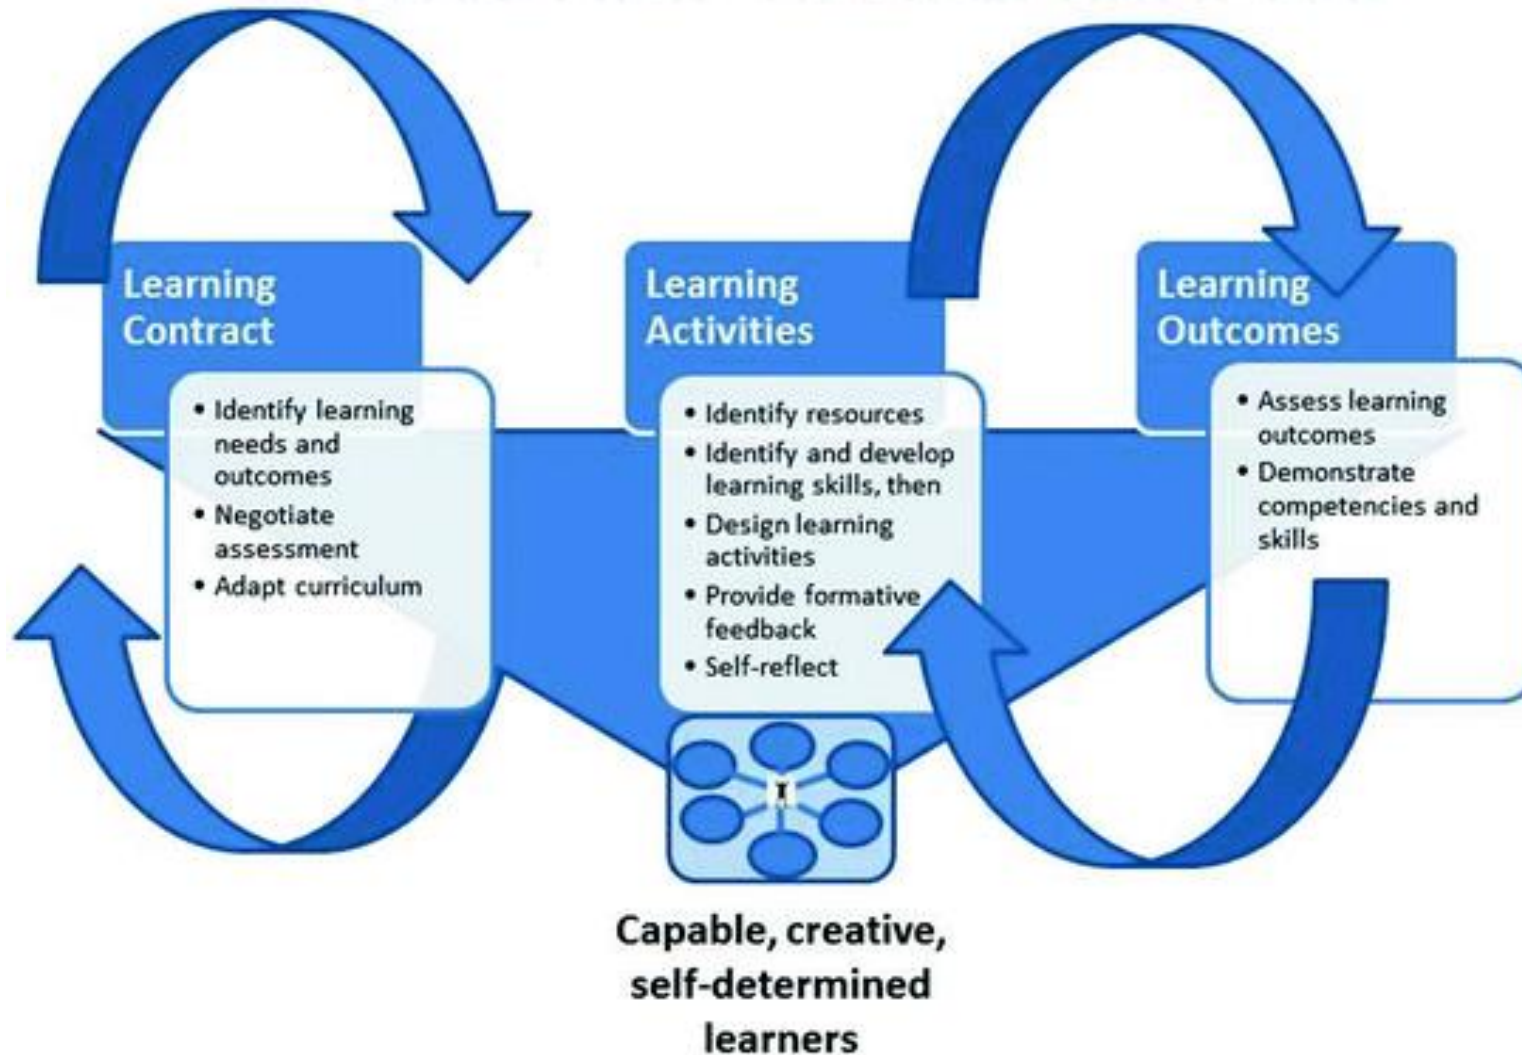

- Learner determines actions
- Inquiry driven
- Knowledge sharing
- Basic understanding of how to learn
- Non-linear
- Lacking a standard curriculum
- No top-down objectives
- Interest-based
- Collaborative

Personalized Learning

- Learner at center
- Emphasis on student learning styles
- Content driven and standards-based
- Often linear
- Learning objectives created with strengths in mind
- Interest plays a role
- Follows a learning plan with a predetermined outcome

- *Customized*
- *Knowledge acquisition*
- *Specific goals for each learner*
- *Respect for individual*

The Golden Circle

Concepts to consider

1. Sense of presence
2. Emotional engagement
3. Other senses
4. Sense of time
5. In the right place at the right time
6. Immersive technologies
7. Storytelling
8. Flow
9. Absorbing the attention
10. Films, games, TV...

What do we mean by quality

Compliance and consumer protection

Quality enhancement and process
improvements

Reputation

The SIMPLE answer:

Quality is in the eye of the
beholder

The COMPLEX answer:

Quality, one size not fit all

**Open
Educational
Resources**

Ministerial Statement 2nd World OER Congress, Ljubljana, Slovenia

- Recall the following UN Frameworks
 - Reaffirm our commitment to the 2030 Agenda for Sustainable Development
 - Recognize the UNESCO Paris OER Declaration 2012
 - Whereas Open Educational Resources are defined as teaching, learning and research materials in any medium – digital or otherwise – that reside in the public domain or have been released under an open license that permits no-cost access, use, adaptation and redistribution by others with no or limited restrictions
 - Acknowledge that Open Educational Resources (OER) represent a strategic opportunity
 - Recognize that in order for OER to reach its full transformative potential for supporting the realization of SDG 4, OER needs to be more integrally a part of educational policies and practices from early childhood education to post-secondary, technical vocational educational training, higher education, lifelong learning and teacher training. Mainstreaming OER-based content will depend upon quality international, national, regional assessments, leadership and commitment to openness and access of OER educational content by users, educators, institutions and governments, and also requires that other pre-conditions to quality education are in place.
-
- Underscore that addressing these OER challenges should not be delayed, in view of the urgency for action to achieve SDG 4 ‘Quality Education’.
 - Reaffirm that toward the realization of inclusive Knowledge Societies, Open Educational Resources (OER) support quality education that is equitable, inclusive, open and participatory.
 - Welcome the Ljubljana OER Action Plan 2017 that calls for actions in the following areas to support the mainstreaming of OER: the capacity of users to access, re-use, and share OER; issues related to language and culture; safety and security of content ensuring inclusive and equitable access; changing business models to support digital transformation according to public funding and legal frameworks; and the development of supportive policy environments.
 - Call on all educational stakeholders to implement the recommendations of the Ljubljana OER Action Plan 2017 to increased international collaboration in the area of OER through a dynamic coalition to expand and consolidate commitments to actions, strategies and legislation in this area.

Commonwealth of Learning:

Materials that may be freely accessed, reused, modified and shared to support teaching and learning at all levels of education (2017a, p.1).

Ljubljana Action Plan:

Teaching, learning and research materials in any medium - digital or otherwise - that reside in the public domain or have been released under an open license that permits no-cost access, use, adaptation and redistribution by others with no or limited restrictions. Open licensing is built within the framework of intellectual property rights as defined by relevant international conventions to respect the authorship of work. OER are a strategic opportunity to improve knowledge sharing, capacity building and universal access to quality learning and teaching resources. (UNESCO, 2017, p. 1).

William and Flora Hewlett Foundation:

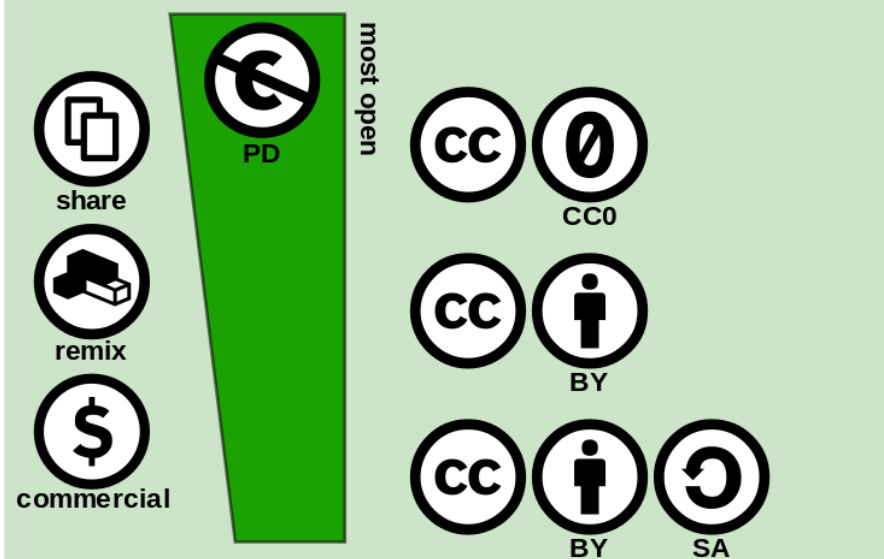

Teaching, learning and research materials in any medium – digital or otherwise – that reside in the public domain or have been released under an open license that permits no-cost access, use, adaptation and redistribution by others with no or limited restrictions (2019).

UNESCO definition, updated 27th May 2019:

Learning, teaching and research material in any format and medium that resides in the Public Domain or are under the copyright that has been released under an open license that permits no-cost access, reuse, repurpose, adaptation and redistribution by others (UNESCO, 2019).

In addition, the UNESCO definition of an **open license** was updated at the Special Intergovernmental Committee meeting in relation to a draft UNESCO recommendation concluded in Paris, May 2019. This updated definition is:

Open license refers to a license that respects the intellectual property rights of the copyright owner and provides permissions granting the public the rights to access, re-use, re-purpose, adapt, and redistribute educational materials.
